Please specify in your order
the promotion code: **Hardcut-23**
and the article numbers of
the chosen HARD-CUT thread
milling cutters.

MTSH Type

Solid carbide thread mills, designed specifically for the machining of hardened materials up to 62HRC. These tools provide high performance, improved cut and an excellent surface finish.

Advantages:

- Low cutting forces thanks to the short profile.
- Working at high cutting speeds.
- Coating provides high wear and heat resistance.

FSH Type

High productive Solid Carbide Thread-Mills with a large number of flutes for machining hard materials up to 65 HRC.

Advantages:

- Coating provides high wear and heat resistance.
Ultra fine grade – dedicated for hardened materials.
- Short chips are produced, to insure high process security.
- Short cycle time – increases productivity.
